ABOUT TASHI INFOCOMM PRIVATE LIMITED

Tashi InfoComm Private Limited is the second cellular company in Bhutan, a separate entity under Tashi Group of Companies. The company was incorporated on January 23, 2007, under the Companies Act of Bhutan 2016, after it won an international bid to operate as the second cellular operator in Bhutan. Pursuant to the grant of Certificate of Re-Registration by the Office of the Registrar of Companies, Ministry of Industry, Commerce and Employment on 27th of November 2023, Tashi InfoComm Limited was re-registered as Tashi InfoComm Private Limited under the Companies Act of Bhutan, 2016.

The cellular license issued by Bhutan InfoComm and Media Authority (BICMA) mandates TashiCell to build mobile network to provide cellular services to the entire nation. The mobile network is based on GSM WCDMA/HSPA+ technologies. The company launched its GSM services on April 6, 2008, under the brand name "TashiCell", with its registered office located at Norzin Lam, Thimphu.

ABOUT THE DEPARTMENT AND SECTION

The Core Network and Carrier Services Department (CN&CS) is responsible Operations, maintenance, upgrades, enhancements and Optimization of Mobile and IP Core systems that encompass all the products and services. It also includes routine O&M including Network performance enhancement tasks.

The section carries out measurements and analysis of the captured data to pinpoint problems such as configuration issues or network resource problems that could be affecting the service. The unit is also responsible for the fault management and performance management of network elements such as RNC, BSC, BTSs, NodeBs, eNodeBs and gNodeBs.

ABOUT THE POSITION

We are looking for a Radio Access Network Engineer who can help design, set up, and improve our radio access network. He/She should be able to study the latest trends in mobile technology like LTE and 5G and have ability to work effectively both independently as well as in a team to get projects done successfully. The RAN Engineer should have strong problem-solving skills and be able to analyze network performance to create plans for improvement. Good communication skills are important, as he/she need to share the findings and make sure everyone understands the benefits of the network upgrades and have willingness to learn and expand on different skills.
